

4 Port USB Hub 5 Gbps with USB Type-A or USB Type-C™ port in transparent housing

Description

This solid USB hub by Delock can be connected to a computer, laptop or mobile device via the USB Type-A or USB-C™ interface. It expands the computer by **4 USB Type-A ports**. Different USB devices such as USB flash memory, card reader, external enclosure etc. can be connected.

Extensive connectivity

Due to the specially designed cable, the Delock hub can be quickly and easily connected to the **USB Type-A or USB-C™** socket. Thus, it can be easily connected to new devices with USB Type-C™ female and older devices that only have a USB Type-A connector.

The cable can easily be detached and connected to the respective connector of the hub. If the cable is not needed, it can be plugged into both connectors and then **acts as a loop**, e.g. allowing the hub to be attached to a pocket.

Transparent enclosure

The **sturdy, transparent plastic housing** provides a view inside. **Three LEDs** on the hub make it look elegant even in the dark.

Small, stable and handy

Due to its small dimensions and its sturdy housing, this Delock hub is particularly **suitable for travelling**. It can simply be packed into the bag together with the laptop or tablet and used as needed.
