■ TECHNICAL SPECIFICATION

TDP: 300 W

Cooling standard: 460 mm

Radiator dimensions: 272 × 120 × 27 mm

Cooling pipes length: 400 mm

Heat sink material: Aluminium

Water block base material: Copper

Number of fans: 2 × 120 mm

Pump power connector: 3-pin

Fans power connectors: 4-pin (PWM)

Fan speed: 600 - 1800 RPM

Pump speed: 2550 RPM

Intel compatibility: LGA 775/1200/1151/1150/1155/1156/1366/
1700/1851/2011/2066

AMD compatibility: AM3(+)/AM2(+)/FM2(+)/FM1/AM4/AM5

Package contents: Radiator with pump, 2 × 120 mm fans, mounting accessories, thermal paste, user manual

NOX 360 mm is a liquid CPU cooler that effectively lowers processor temperatures, ensuring rock-solid stability in both demanding games and creative workloads. The 360 mm radiator with a copper base dissipates heat quickly, while three 120 mm PWM fans intelligently adjust their speed—quiet at idle and delivering maximum performance under load. Flexible tubing makes installation easier, and the complete kit with thermal paste and mounting accessories ensures a quick, hassle-free setup. Broad compatibility with Intel and AMD platforms makes NOX 360 mm a modern choice for many builds. By lowering temperatures and reducing noise, it extends component lifespan and improves everyday comfort.
