HP 1TB, SATA, 3.0G, NCQ, 7200 rpm internal hard drive 3.5" Serial ATA II:

SATA 7200 rpm drives are our standard high bandwidth hard drive storage options; most workstation models are also available with high performance 10K rpm rotation speeds. Storage capabilities range up to a massive 1000 GB (1 TB).

- SATA Hard Drives use the SATA interface running at up to 3 Gb (Gigabit) per second. Actual sustained transfer rates are lower due to command protocol and SATA bus management overhead.
- Native Command Queuing allows the hard drive to have several write or read commands outstanding at the same time
