Unold Turmventilator Black Tower:

The blue ambient lighting in the stable base is the optical icing on the cake: The stylish TURMVENTILATOR Black Tower is refreshing design in top form! With its 9-stage speed control, it can be set to all cooling requirements. And these can be pre-programmed for 1 to 8 hours using the timer function. The switchable 90° oscillation distributes the air in the room - and does so at night too via the switchable night mode. It comes into action via the practical remote control with a clearly visible LED display and touch control.
